

Catchers Skills Clinics - \$15 Each

PRESENTED BY FORMER PROFESSIONAL CATCHER JOE SIWA

Leadership, intelligence, toughness, accurate arm, soft hands, quick feet, and heart; these are the seven qualities of a catcher. Make sure you are prepared for take on the responsibilities that come with being a catcher. A hard working, intelligent catcher is rarely noticed, but an incompetent one sticks out.

BLOCKING AND RESPONSIBILITIES OF A CATCHER

Fall Speed, Strength, and Agility Training

Speed, strength, and agility are not attributes confined to any one sport. Ask any coach what the first thing they notice when trying out a player is, and they will tell you speed.

If you ever go to any showcase or combine, the first thing they will usually test is a 60 yd dash. Strength and agility are also key components in fielding, base running, and hitting. Increase in strength and agility will give you that quicker first step when chasing down a fly ball or turn a ground ball single into a double in the gap.

Six sessions meeting weekly on Fridays starting August 27th. Cost is \$50, less than \$10 a session!
